laser. marking cutting engraving

DESIGNED SPECIFICALLY FOR EDUCATION_ EduCut 300

The EduCut Laser Cutting Machine from Trotec

Designed specifically for education and manufactured in Europe by Trotec.

Choice of **30 watt** or **60 watt** Laser Tubes

726mm x 432mm cutting area

1090mm x 890mm x 590mm outside dimensions (W,H,D)

HONEYCOMB TABLE

The reduced contact area of the material with the working table minimizes beam back reflection and yields perfect cutting results. Smoke and air are exhausted downward.

Straight-edge rulers and mounting clips for precise positioning in the processing chamber are included.

EXHAUST SYSTEMS

An exhaust system is absolutely recommended for optimal operation of the laser, to protect the laser device, and to protect your students. Trotec offers a variety of exhaust systems depending on the application. Special integrated electronics let you control the

Trotec exhaust systems remotely via JobControl software. For details on this please refer to the "Exhaust Systems" brochure.

European built laser cutting and engraving machines

- Highest accuracy and flexibility
- Exceptional software
- Complete UK Support
- Designed for commerce and industry
- Used in education, intuitive to use
- Improve career prospects, educate on a Trotec
- Exceptional price points
